National Workshop in Bari

On the 23rd of June 2025, the Polytechnic University of Bari (POLIBA), a partner in the ANGIE consortium held a workshop in Bari on Sustainable Production Key Elements in Teaching. Bringing together 15 participants, including academics and educators from middle school, the event focused on integrating sustainability principles into teaching of production systems, with emphasis on circular economy practices, low-emission manufacturing technologies, and sustainable supply chains. Using real-life case studies, the workshop deepened participants' awareness of the green transition, strengthened critical thinking, and equipped them with tools to embed green skills in education (see photo on the right).

National Round Table in Vienna

The University of Applied Sciences Upper Austria (FHOÖ) organised a Round Table on 5-6 June 2025 at the Hyatt Vienna, bringing together more than 200 stakeholders from across the inland waterway transport (IWT) ecosystem, including policymakers, logistics professionals, insurers, surveyors, brokers, manufacturers, and environmental advocates. The event aimed to foster cross-sector collaboration and raise awareness of inland waterway transport's potential to contribute to Europe's green transition.

A highlight of the Round Table was the presentation by Dr. Lisa-Maria Putz-Egger, Head of the Logistics Competence Centre at FHOÖ, titled "Navigating the Future: Current Status and Innovations in Danube Logistics."

Her presentation explored the evolving landscape and future potential of Danube logistics, particularly in the context of sustainable transport and innovation. The discussions underscored the growing importance of inland waterway transport in achieving Europe's climate and sustainability goals.

ANGIE in the Spotlight at the ACEEU Forum in Prague

From 9-12 September, the Czech University of Life Sciences hosted the 2025 ACEEU Forum, welcoming 153 participants from 42 different countries.

The gathering brought together academics, researchers, university leaders, administrators, and other higher education professionals.

The forum blended research tours, keynote sessions, and EU funding workshops. It also promoted the ANGIE Erasmus+ Project as part of the innovative projects shaping higher education in Europe. By positioning students, educators, and youth workers as true agents of change, ANGIE stood out as a good example of how higher education institutions can contribute to the green transition.

Join the Webinar Series: "Producing Sustainability through Education"

The ANGIE consortium invites you to the upcoming webinar series "Producing Sustainability through Education."

Speakers from seven European countries will share insights on how diverse sectors of activity impact the health of our environment, exploring innovative ways to embed sustainability in professional and everyday life.

The Webinar will also feature the ANGIE Master's program, designed to train and empower specialists and experts who work in various economic entities.

See posters below for the dates and times of each webinar, as well as the registration link or QR code to secure your spot.

ANGIE WEBINAR Manufacturing and Environment

Date and Time
22nd October 2025; 17:00 CET

1. ANGIE and the Transition to Green for a Sustainable Society Master study program
Danut Savu,
University of Craiova, RO
2. Human-Robot Collaboration in 3D-Printing
Giuseppe Casalino,
Politecnico di Bari, IT
3. Plastic Circularity: A Path to Sustainability
Inês Ascenso Pires
Universidade de Lisboa, PT
4. Towards Sustainable Joining Processes
Damjan Klobčar
Univerza v Ljubljani, SI

ANGIE WEBINAR Waste Management and Environment

Date and Time
20th November 2025; 17:00 CET

1. ANGIE and People
Danut Savu,
University of Craiova, RO
3. Plastic Circularity: A Path to Sustainability
Inês Ascenso Pires
Universidade de Lisboa, PT
3. Managing Tourism Waste: Seasonal Differences and Sustainable Solutions
Manuel Gonzalez Sanchez
Universidad de Málaga, ES
4. Online Research in Environmental Issues
Ioan Hosu
Universitatea Babeș-Bolyai, RO

Scan QR code to register

ANGIE WEBINAR Logistics and Environment

Date and Time
4th November 2025; 17:00 CET

1. New Master's study program: Transition to Green for a Sustainable Society
Danut Savu,
University of Craiova, RO
2. Sustainable Multimodal Transport
Sophie Wiesinger
FHÖO Forschung & Entwicklung, AT
3. Maritime Transport as a Key Mode of Transport in Logistics Processes and its Impact on the Environment
Andrej Dávid
Žilinská univerzita v Žiline, SK
4. Integrating the European Green Agenda in Education
Ioan Hosu
Universitatea Babeș-Bolyai, RO
